This morning I was perusing the last upload conversion of a text thread using Truecaller and E2PDF, the combination of which has been used in many court cases as admissable evidence, posted publicly on the Internet Archive with the rest of my complete output as an artist. With the file being so long, the E2 app tended to miss random individual entries, so for a complete record multiple files were saved as time progressed. They are presented as a lasting and inspiring permanent catalog of my personal journey through the public and private gaslighting campaign I have suffered through perpetrated by Thomas Wayne Randle and Pamela Jo Daby - the white supremacist narcissistic abuser who seven years ago cut off all communication with my fiancé who was trying to escape his imprisonment and her jealous sister respectively.

To this day Tommy Tiny Penis continues to steal identities of at least a dozen people including family members - at least one deceased for over a decade - in efforts to lie and spread lies concerning the whereabouts and health of the woman who asked me to marry her, Patricia Ann Roberts/Coffey/Dumas/Randle. She was last seen at 2164 Craigend Lane, Lake Orion, Michigan. The residence was listed as being over $86,000 in tax debt over according to Oakland County court records some time ago, he being a QAnon conspiracist that buys into his personal exemption from such responsibilities, referring often to being a Congressional Sheriff. More information on this ideology can be found on the internet, particularly the Southern Poverty Law Center's site.

She told me he tore apart her five tiny dogs - Cesar, Julio, Ace, Secret, and Romeo - and forced her to cook their mangled bodies on cookie sheets, forcing her to watch while he ate them. Apparently, he got sick, as they had just had their parvo shots. This is just one of the many horrific things related to me in telephone conversations, some of them fifteen hours in length each.

He is a 'ranking member' and financier of a local white supremacist group that maintains a members-only clubhouse with an alcohol license. When conversing with someone who claimed to live in the area on Reddit, this information sparked the question "Which one?" Lake Orion is also home to a ground shipment company with reported openly racist policies proudly displayed. Recently their police chief was demoted and at least one officer fired with termination of license for corruption. Repeated missing person poster pleas on Lake Orion specific Reddit groups, general and specific Facebook, Instagram, Twitter, LinkedIn, etc. have led to no information other than one person who claimed to have lived in Lake Orion their entire life and had never once seen her. This includes at the city library, which is in walking distance from the residence and which she mentioned she was a frequent patron. Patty is highly intelligent and was often in attendance at the Schertz, Texas library when I was over a decade growing up next door to her. Multiple emails to the Lake Orion library received no response. The local police failed to make even a visual confirmation of her presence when called on welfare checks twice, failing both her and her community.

Thomas Wayne Randle has paid to have information available online with both free and paid person search sites scrubbed, even altering some records to hide the fact that his genetic heritage is not Caucasian to better fit in with his bedsheet wearing peer group. He is a champion of QAnon and right-wing conspiracy theories who goes as far as to pattern his speech after Rush Limbaugh, who he tried to erect a statue of on public Lake Orion grounds, only to be voted down.

Narcissistic abusers prey on their victims by isolating them from all friends and family in order to be in complete control and free of interference while emotionally and physically abusing their target. This behavior inevitably turns violent and recovery websites are filled with tragic stories of victims who escaped and memorials and police reports of those who did not.

More than half of all murders in the United States now go unsolved. Only those who have someone actively looking for them have much of a chance of being found.

Emails to all battered women's shelters in the area listed have gone unanswered.

I have launched a career as record label owner, ASCAP registered songwriter, recording artist, video editor and producer, author of fiction, autobiography, and religious texts - a large portion of my writings and both spoken word and musical tracks spanning five album releases being dedicated to spreading awareness of our story as much as possible. In the past three and a half years I have managed to earn over five million reads, listens, watches on so many sites and services I have to consult a written list to keep track. I am eleven tracks into the sixth album. There are five books typeset and being edited in the Kindle Create app. At one point an extremely favorable review was published in TJPL News - a British music magazine similar to Rolling Stone - taking up the entire ninth page behind a glossy cover with a smiling pop star, Gia Lily. I've had twenty-two other online reviews and features by music blogs and influencers. I have been published on the SixSentences blog, a Writer's Digest Top 101 site, with the page counter currently over 1,656,700.

Every time I wake up, immediately I continue to work until exhausted I fall back asleep. Nothing else is important to me. This must be stopped before it is too late. If it isn't already.

It is intolerable that this could happen anywhere, much less in twenty-first century America. Even private investigators in both Texas and Michigan and personal injury attorneys - all offered $10,000 - refused to take the case, most of them even lying about examining the documents posted on the Internet Archive. Almost a hundred journalists - including the one who wrote the Lake Orion Police corruption coverage - have failed to respond to detailed emails concerning the case.

A nation of hypocrites and psychopaths on the parade. I will never give up. I know somewhere, someone has an answer.

January 5th would be Patty's 58th birthday. We were born in the same room of the same military hospital to the same birth certificate signing doctor in Abilene, TX - ten years, six months, ten days and one minute apart. I am 47. Thomas Wayne Randle is 67 or 68 by now. It has been seven years of hurtful deceptions carried out by inferior intellects that are accustomed to not being questioned. Countless days spent documenting evidence and publicly posting the results. The gun shop a few streets away will sell me an AEA .72 caliber Zeus airgun capable of hunting bears and wild boars for $350, complete with sound suppressor (airguns are not firearms, despite their lethality, and I live in Texas). If no one will do anything, then I have to.

AND

the mayor of Lansing - Andy Schor - also notified in the comments section of one of his posts on LinkedIn which was given several thumbs up by his constituents

the Oakland County Sheriff's Office - headed by Michael J. Bouchard - identified by their website as Oakland County's Longest Serving Sheriff - since January 1999 - notified 12/28/24

the Oakland County Prosecuting Attorney's Office - Karen D. McDonald - who includes a checkbox on their site indicating whether or not the sender would like a response - I did - none was given - also 12/28/24

every Lake Orion City Council member and city employee listed on their website

There is a very large amount of information available here:

https://linktr.ee/TheProphetObblonge

Thank you for your time. It is all we have, and yours isn't taken lightly.

Over 100 attorneys have declined the case.

13 private investigators turned down $10,000. Long gone are the days of hard-boiled noir. None of them wanted to even leave the office - one claiming 'it was too dangerous.' When I had a business email associated with my old website I applied for usage of the probable same database they would have used and was denied access - I wasn't looking for the owner of a specific piece of real estate I wanted to purchase, only a missing person who was last seen with someone who loudly proclaims women are property and who is still engaging in online identity theft of both relatives and random accounts.

I was able to confirm through Ryan,LLC's HR department in India that Thomas Wayne Randle was fired a decade ago from their employment. His LinkedIn profile insists he is still a 'Director' at their non-existent Troy offices. The woman was even nice enough to give me her personal cell number should I need any further assistance.

Both of Patty's daughters - Brittany Coffey and Kylie Dumas/Frank - have no publicly accessible socials.

Both of her nieces - Breanna Daby and Laren Bratton - had their Instagram accounts hacked along with Brittany. I can find no way of getting in touch with either of them. None of these now fully grown women have any reason not to speak to me. An example of this:

I wonder how many LOPD officers are no longer employed there since my welfare check calls. While the recent news article concerns one specifically fired with license termination, other articles I found refer to new hires.

One record search of Oakland County's site reveals a copy of the home refinance. It no longer lists Patricia as a co-owner. It also states that the property is being sold with The Congressional Sheriff of Oakland County. This is a white supremacist racist reference. The Southern Poverty Law Center website has a section on this particular group. I have noted the head of this organization held a large symposium in Texas at the same time Thomas Wayne Randle is listed as living in the same city.

I have written these things so many times that I expect the exact same response with each iteration.

My father was born in Dearborn, the 7th of 8, the rest sisters. As far as I can tell, five of his older sisters remained in the area. It is quite possible that I have hundreds of cousins in the area. Online genealogical research has so far not been successful.
